13. ABSTRACT (Maximum 200 words)

This guide identifies and provides details on 72 commercially available electronic data interchange (EDI) translation software packages. It was developed for use by the Military Departments and Defense agencies as they procure EDI translation software packages in support of the Department of Defense's (DoD's) EDI program for transportation. However, other DoD entities with an EDI program should find this guide useful.

This guide assesses the key features of each package, details a list of functions available in a particular software package, and highlights those features required to meet the EDI needs of Defense transportation in specific operating environments.

14. SUBJECT TERMS

Transportation; Electronic Data Interchange; EDI; EDI Translation Software; EDI Software

A GUIDE TO EDI TRANSLATION SOFTWARE

1991 Edition

This edition of *A Guide to EDI* [electronic data interchange] *Translation Software, 1991 Edition* updates and expands the information presented in our previous version published in August 1989. As in our earlier edition, the guide identifies and provides details on commercially available EDI translation software packages. It was created to aid the Military Departments and Defense agencies as they procure software in support of DoD's EDI program for transportation. However, all DoD entities with an EDI program should find the guide useful.

In the guide, we identify a variety of EDI software packages, assess the key features of each package, detail a list of functions and features that could be contained within a particular software package, and highlight those features that we believe are required to meet the EDI needs of Defense transportation in specific operating environments. We also show how to use the guide to select EDI translation software.

We obtained information on the various translation software packages from product brochures and telephone interviews. We have not seen demonstrations of every software package, so we cannot endorse their effectiveness. Furthermore, we did not survey vendors that remarket EDI translation software products or that sell industry-specific (nontransportation) products. As in the preparation of the 1989 edition, some vendors did not respond to our requests for additional information.

The guide consists of a glossary and five appendices. The glossary defines the acronyms used throughout the guide and the terminology used to describe the various EDI software functions and features.

Appendix A lists the EDI software vendors we contacted during the preparation of the guide. The vendors are grouped by the type of hardware required to use the software: microcomputer, minicomputer, or mainframe. In addition, Table A-1 identifies the vendors that were excluded from the guide and the associated reasons.

Both the vendor list and the table provide the vendor's address, telephone number, and point of contact.

Appendix B provides detailed information on each of the EDI translation software vendors identified in Appendix A. It focuses on the products offered by the vendors including the hardware operating environment, software pricing, and third-party networks directly accessed by the software package.

Appendix C identifies 48 functions and features that could be contained within a particular EDI translation software package. It also indicates those functions that we regard as required to meet the EDI needs of Defense transportation in specific operating environments.

Appendix D presents the results of the telephone surveys. The information is categorized by the type of hardware required to use the software: microcomputer, minicomputer, or mainframe. It also provides details on some of the software functions highlighted in Appendix C.

Appendix E lists the steps to be followed when using the guide to select EDI translation software packages.

If you need further information on any of the EDI translation software vendors or the capabilities of their software, you may contact either the person listed below or the vendors directly:

GLOSSARY

DEFINITION OF ACRONYMS

AIAG	=	Automotive Industry Action Group
ANSI	=	American National Standards Institute
APL	=	A Programming Language
ASCII	=	American Standard Code for Information Interchange
AT&T	=	American Telephone and Telegraph
BASIC	=	Beginners All Purpose Symbolic Instruction Code
BT	=	British Telecom
BTOS	=	Burroughs Operating System
CICS	=	Customer Information Control System
CNCP	=	Canadian National/Canadian Pacific
COBOL	=	Common Business Oriented Language
CPU	=	central processing unit
CTOS	=	Convergent Technologies Operating System
CTX	=	Chrysler Telecommunication Exchange
DB2	=	Database 2
DEC	=	Digital Equipment Corporation
DOS	=	disk operating system
DOS/VSE	=	disk operating system/virtual system extended
DTS	=	Document Transmission System
DIBOL	=	Digital COBOL
EBCDIC	=	Extended Binary Coded Decimal Interchange Code
EDI	=	electronic data interchange
EDIFACT	=	Electronic Data Interchange for Administration, Commerce and Transport
EFT	=	electronic funds transfer
FORTRAN	=	Formula translator

FTS	=	Financial Transmission System
GEIS	=	General Electric Information Services
GM	=	General Motors
HP	=	Hewlett-Packard
IBM	=	International Business Machines
ID	=	identification
IMS/DC	=	Information Management System/Data Communications
LAN	=	local area network
MB	=	megabyte
MPE	=	multiprogramming executive
MSA	=	Management Science America
MS-DOS	=	Microsoft disk operating system
MVS	=	multiple virtual storage
NCR	=	National Cash Register
PC	=	personal computer
PS/2	=	Personal System/2
QMF	=	Query Management Facility
RAM	=	random access memory
RJE	=	remote job entry
RM COBOL	=	Rand McFarland Common Business Oriented Language
RMS	=	Release Management Systems
RPG	=	report program generator
SCO	=	Santa Cruz Operation
SQL	=	Structured Query Language
TCIF	=	Telecommunications Industry Forum
TDCC	=	Transportation Data Coordinating Committee
TSO	=	timesharing operation
UCS	=	Uniform Communication Standard
VAN	=	value-added network
VAX	=	virtual address extension

VICS	=	Volunteer Interindustry Communication Standard
VLT	=	variable length translator
VMS	=	virtual memory system
WINS	=	Warehouse Industry Network Standard

DEFINITION OF TERMS

Application System Interface. A routine that extracts data from an application system database and creates fixed-length files in the vendor's format for subsequent translation to an EDI format. The reverse process is also applicable.

Automated Purging. A feature that automatically deletes archived transaction set data according to user-specified criteria, such as date ranges.

Automatic Recovery/Restart Capability. A routine that automatically recovers any data being processed and restarts the application in the event of a power failure or a communications failure.

Character Conversion Capability. Translation software that converts a sender's character set to the character set required by the receiver's computer (e.g., EBCDIC to ASCII).

Code Conversion Capability. The ability to convert an EDI standard data element code into a user-unique code.

Compatibility with Encryption and Authentication Package. A translation software package that can operate with an encryption and authentication package.

Communications Software. A software module that automatically dials the communications network and sends or receives EDI-formatted data.

Data Element Delimiter Table. A table of alternative data element delimiters that is maintained for each trading partner, thus accommodating the requirements of different trading partners.

Data Input Screens. A set of screens used to enter data into the translation software package for subsequent translation into an EDI format. (This feature is required when an application system does not reside on the user's computer.)

Error Reports. Reports of outbound or inbound transaction sets that do not comply with the EDI standards. (These reports are usually printed logs of each communications session presented in a non-EDI format easily understood by the user.)

Expandability. The ability to incorporate new functions, such as EDI transaction sets, into an existing translation software package.

Functional Acknowledgment Capability. The ability to send or receive a Functional Acknowledgment Transaction Set that indicates the status of each EDI transaction set transmission to or from a trading partner.

Functional Acknowledgment Reconciliation. The matching of transaction set messages with functional acknowledgments to identify the successful receipt of information by trading partners and the highlighting of unacknowledged transaction sets that have been sent.

Help Screens. On-line screens that provide assistance in the use of specific translation software functions.

Inbound Standards Compliance Editing. The editing of data received from trading partners to determine whether they are in compliance with the EDI standards.

Inbound Transaction Set Reporting. The capability to print inbound transaction sets for audit trail purposes. (The date and time of every message received should be included in the report.)

Input Editing. A feature that permits the user to edit each field and segment of a transaction set as data are manually entered into a system in order to ensure compliance with EDI standards.

Installation Routines. Programs that automatically install translation software packages onto a computer with minimal user intervention.

Internal ID Number Duplication Control. A program that monitors the use of internal business document identification numbers, such as invoice numbers, to avoid duplicates.

Maintenance Support. EDI standard updates and software enhancements provided by the translation software vendor, usually for an annual fee.

Multiple Communications Interface. Translation software that allows communication with more than one telecommunications network, preferably in the same communication session.

Multiple Header Support. EDI translation software that supports multiple envelope headers including ISA and BG, depending on trading partner requirements.

Multiple Users. A feature that permits more than one person to use a translation software system concurrently. (On those personal computers that use DOS, a local area network typically provides this feature.)

Network Identification Table. A table containing network addresses, telephone numbers, and other related information needed to communicate with a trading partner through a telecommunications network.

Outbound Standards Compliance Editing. The editing of data sent to trading partners to determine whether they are in compliance with EDI standards.

Outbound Transaction Set Reporting. The capability to print outbound transaction sets for audit trail purposes. (The date and time of every message sent should be included in the report.)

Segment Terminator Table. A table of alternative segment terminators that is maintained for each trading partner, thus allowing for different communications network or trading partner requirements.

Selective Accessibility. A feature that limits user access to specific screens and functions.

System Entry Security. Features that provide system security through the use of passwords and/or user-identification codes.

Table-Driven Software Structure. EDI data elements and segments maintained in a table structure.

Technical Documentation. A narrative and graphic description of a system that provides technical personnel with sufficient details to "troubleshoot" portions of the

translation software. (A data dictionary, a system flow chart, and all file structures are typically included in technical documentation.)

Trading Partner Profile. A profile of each trading partner that identifies the segments in a transaction set required by that trading partner.

Training. Vendor-offered training sessions that teach how to use their translation software package.

Transaction Set Archiving. EDI-formatted data that are saved on the computer for query purposes or for restoration in the event of a computer failure.

Transaction Set Consolidation Routines. Software that groups transaction sets by trading partner prior to transmission, thus reducing communications costs; if more than one telecommunications network is used, the transaction sets are first grouped by network and then by trading partner.

Transaction Set Correction Capability. The ability to either correct an outbound standards compliance editing error in a front-end operating environment or modify transaction set data prior to transmission. (This capability should be provided in a format that does not require knowledge of EDI standards.)

Transaction Set Sequential Numbering. A routine that either assigns a sequential control number for all transmitted transaction sets for each trading partner or enables the receiver to determine whether a transaction set is missing from the transmission by checking the sequential numbers of inbound transactions.

Transmitted Characters. A report of the number of characters transmitted and the time and date of each transmission for each network. (The report allows the user to reconcile each network's bill.)

Tutorial Package. An interactive, on-line program that guides a user through a prescribed sequence of steps on using a particular translation software package.

Unattended Operations Capability. The ability to program the EDI translation software to automatically perform EDI-related processes such as sending or receiving EDI-formatted data at a user-specified time without operator presence.

User-Definable System Interface. Automated data-mapping procedures embedded in the EDI translation software package that create fixed-length files

according to the user's requirements for subsequent translation to an EDI format. The reverse process is also applicable.

User-Defined Management Reports. Ad hoc management reports that can be created by the user, typically through a report generator embedded in the translation software package.

User-Defined Print Output. A feature that permits the user to define the output format for printing manually entered data.

User Documentation. A nontechnical description of the translation software system and the operation of all system functions.

User Support (Hot Lines). Telephone support provided by a vendor to resolve any operating problems when using a translation software package.

User-Defined Data Input Screens. A set of user-defined screens for entering data into the translation software package for subsequent translation into an EDI format. These screens are presented in a non-EDI format that does not require knowledge of EDI standards.

Version Support. Translation software that supports the current and two previous releases of an EDI standard.

Version Support Table. A table that identifies the version of every EDI standard being used by each trading partner.

APPENDIX A

EDI TRANSLATION SOFTWARE VENDOR LIST

This appendix lists all the EDI translation software vendors contacted during the preparation of this guide. We have grouped the vendors according to the hardware required by their software: microcomputer, minicomputer, or mainframe. Those vendors excluded from the guide and our reasons are provided in Table A-1. Both the list and the table provide an address, telephone number, and point of contact for each vendor.

Company	Contact	Reason
Txbase Systems, Inc. 20 Valleywood Drive, Suite 101 Markham, Ontario L3R6G1	Ray Talwar (416) 477-1238	Product is industry specific; translator is sold as part of a repetitive manufacturing system on Unix platforms (translator is from Electronic Data Systems).
Universal Software, Inc. Marshfield Professional Center 1020 Plain Street Marshfield, MA 02050	Norman Platt (617) 837-5011	Provides EDI communication software to EDI VANs for IBM DOS/VS(E) and MVS operating environments.
Vertical Systems, Inc. 2030 First Avenue, Suite 201 Seattle, WA 98101	Bill Pickard (206) 728-7111	Remarkets Wright System's, Inc., EDI translation software package, "Wright EDI."
World Trade Services P. O. Box 569 Beaverton, OR 97075	Mark Anderson (800) 338-4333	Product has been developed primarily for international trade management.

APPENDIX B

VENDOR INFORMATION

This appendix provides detailed information on the products offered by each of the EDI software vendors, including hardware operating environment, product pricing, and third-party networks directly accessed by the software.

ACS Network Systems

Address: 1000 Burnett Avenue
Concord, CA 94520

Contact: Michael Nelson

Phone: (415) 602-2000

Product: EDI/36
EDI/38
EDI/4XX

Hardware/Operating System Environment: IBM System 36, System 38, AS400

EDI Standards/Transaction Sets Supported: X12, TDCC, UCS, EDIFACT

Pricing:

Basic Package Cost:

Includes one network communications module

EDI/36: \$5,700

EDI/38: \$9,000

EDI/4XX: \$7,000 – \$18,000

Additional Charge Per EDI Standard: None

Additional Charge Per Transaction Set: None

Annual Maintenance Fee: 12 percent of purchase price

Maintenance Fee Includes: Standards updates, software enhancements, telephone support

Training Fee: \$595; classes are scheduled monthly on the East Coast, Midwest, and West Coast.

Additional Fees: Additional network communications modules cost \$700 – \$1,000 depending on the computer used.

Networks Directly Accessed: GEIS; ORDERNET; IBM; Control Data; AT&T; Western Union; Kleinschmidt; TranSettlements; CompuServe; Harbinger; Agri Data; Ford; Chrysler; GM; Walmart; Sears; BT Tymnet

Vendor Experience

Year Company Founded: 1987 (parent company formed in 1976)

Date Package First Available: 1987

EDI Professional Staff Resources

Technical Staff: 42

Hot Line: 14

Total: 68

Miscellaneous Information: Toll-free telephone support; vendor is a division of Premenos Corporation.

Programming Language Used by Package: RPG

Advanced Communications Systems

Address: 25054 Lorain Road
North Olmsted, OH 44070

Contact: Dan Norris

Phone: (800) 223-5424

Product: ACSPCX12

Hardware/Operating System Environment: IBM compatible XT, AT, PS/2, with 10MB hard disk, 640K RAM, MS-DOS 3.0

EDI Standards/Transaction Sets Supported: TDCC, ALAG, X12, ANSI subsets

Pricing:

Basic Package Cost:

\$1,650; (Transaction sets cost an additional \$350 for each trading partner.)

\$3,000; (Includes four trading partners and all transaction sets; \$350 for each additional trading partner.)

Additional Charge Per EDI Standard: None

Additional Charge Per Transaction Set: None

Annual Maintenance Fee: \$595

Maintenance Fee Includes: Software enhancements, standards updates, telephone support

Training Fee: On-site installation included in the purchase price for a limited area; must pay airfare for one instructor.

Additional Fees: Not available

Networks Directly Accessed: Control Data; GEIS; RAILINC; CompuServe; Ford; GM; Walmart; Service Merchandise; IBM; CTX; BT Tymnet

Vendor Experience

Year Company Founded: 1985

Date Package First Available: 1987

EDI Professional Staff Resources

Technical Staff: 6

Hot Line: 2

Total: 15

Miscellaneous Information: Revenue is derived exclusively from EDI services.

Programming Language Used by Package: COBOL

Advantage Systems, Inc.

Address: 30680 Montpelier Drive, Suite 350
Madison Heights, MI 48071

Contact: David Williams

Phone: (313) 588-3480

Product: EDI Advantage

Hardware/Operating System Environment: IBM System 36, 38, AS400

EDI Standards/Transaction Sets Supported: X12

Pricing:

Basic Package Cost:

Includes two transaction sets and source code

System 36: \$3,000

System 38: \$6,000

Additional Charge Per EDI Standard: None

Additional Charge Per Transaction Set: System 36 — \$500; System 38 — \$700

Annual Maintenance Fee: 15 percent of installed software price

Maintenance Fee Includes: Hot line, standards updates, software enhancements

Training Fee: None

Additional Fees: None

Networks Directly Accessed: Control Data, BT Tymnet

Vendor Experience

Year Company Founded: 1984

Date Package First Available: 1986

EDI Professional Staff Resources

Technical Staff: 3

Hot Line: 1

Total: 5

Miscellaneous Information: Product was developed primarily for the automotive industry but is not restricted to that industry.

Programming Language Used by Package: System 36 – RPG II
System 38, AS400 – RPG III

American Business Computer

Address: 1968 Green Road
P. O. Box 305
Ann Arbor, MI 48106

Contact: Anne Hurtubise

Phone: (313) 930-7840

Product: EDE-PC (written for automotive industry)
EDI-ExCel/PC
EDI-ExCel/Unix
EDI-Server (for distributed EDI systems)

Hardware/Operating System Environment:

EDE-PC: IBM compatible XT, AT, PS/2, with DOS 2.0 or higher, 10MB hard disk, 512K RAM

EDI-ExCel/PC: IBM compatible PC

EDI-ExCel/Unix: AT&T 3B family; NCR Tower (Unix or SCO Xenix); HP9000; Gould-UX; IBM RS/6000

EDI-Server: AT&T 3B family; NCR Tower; HP9000; IBM RS/6000

EDI Standards/Transaction Sets Supported: X12, TDCC, WINS, UCS

Pricing:

Basic Package Cost:

EDE-PC:	\$2,000	—	\$5,000
EDI-ExCel/PC:	\$3,000	—	\$7,000
EDI-ExCel/Unix:	\$5,000	—	\$15,000
EDI-Server:	\$15,000	—	\$100,000

Additional Charge Per EDI Standard: None

Additional Charge Per Transaction Set: None

Annual Maintenance Fee: EDE-PC, EDI-ExCel, and EDI-Server — 20 percent of retail software cost

Maintenance Fee Includes: Hot line, standards updates, software enhancements

Training Fee: Included if at vendor's location; if at user's location, travel and living expenses.

Additional Fees: Not available

Networks Directly Accessed: GEIS; CompuServe; Control Data; IBM; Kleinschmidt; ORDERNET; Telenet; Chrysler; Ford; GM; AT&T; BT Tymnet

Vendor Experience

Year Company Founded: 1976

Date Package First Available: EDE-PC: 1986; EDI-ExCel: 1989; EDI-Server: 1990

EDI Professional Staff Resources

Technical Staff: 10 plus 5 contractor personnel

Hot Line: 6

Total: 40

Miscellaneous Information: Vendor is owned by TSM Computing Group, a subsidiary of Thomas Monaghan, Inc.

EDE-PC is sold as a "solution" product for the automotive industry; EDI-ExCel and EDI-Server are not industry specific.

Programming Language Used by Package:

EDE-PC: Available in both BASIC and C

EDI-ExCel: C

EDI-Server: C and Informix database

American Custom Software, Inc.

Address: 2420 Fisk Road
Cookeville, TN 38501

Contact: Robert Sparkman

Phone: (615) 537-6516

Product: BPT (Business Partner Translator)

Hardware/Operating System Environment: IBM compatible PC, XT, AT, PS/2, with 10MB hard disk, 640K RAM, MS-DOS 3.0 (will operate on Novell Network)

EDI Standards/Transaction Sets Supported: X12, ALAG, VICS, UCS, TDCC, WINS, GM, Ford

Pricing:

Basic Package Cost:

One trading partner: \$1,995

Multiple trading partners (includes setup for 1st 10 partners): \$2,995

After 10th partner: \$295 per transaction set

Additional Charge Per EDI Standard: None

Additional Charge Per Transaction Set: See above

Annual Maintenance Fee: 15 percent of software cost

Maintenance Fee Includes: EDI help desk, standards updates, software enhancements

Training Fee: On site: \$450 per day plus expenses

Additional Fees: None

Networks Directly Accessed: GEIS; IBM; Control Data; Kleinschmidt; BT Tymnet; RAILINC

Vendor Experience

Year Company Founded: 1984

Date Package First Available: 1988

EDI Professional Staff Resources

Technical Staff: 3

Hot Line: 3

Total: 10

Miscellaneous Information: First wrote EDI translation software for the automobile industry in 1984.

Programming Language Used by Package: BASIC, C, Assembly

The APL Group, Inc.

Address: 644 Danbury Road
Wilton, CT 06897

Contact: Rick Samuelson

Phone: (203) 762-3933

Product: QualEDI

Hardware/Operating System Environment: IBM compatible XT, AT, PS/2 with MS-DOS 3.1 or higher

EDI Standards/Transaction Sets Supported: X12, TDCC, UCS, VICS, WINS, EDIFACT

Pricing:

Basic Package Cost:

Single trading partner: \$1,650

Stand-alone: \$2,700

Front-end: \$3,200

(Vendor offers volume discounts)

Additional Charge Per EDI Standard: None

Additional Charge Per Transaction Set: None

Annual Maintenance Fee:

Single trading partner: \$450

Stand-alone: \$550

Front-end: \$700

Maintenance Fee Includes: Hot line, software enhancements, standards updates, and all transaction sets currently used as well as those requested in the future

Training Fee: On site: \$500 per day plus travel and expenses

Additional Fees: Not available

Networks Directly Accessed: BT Tymnet; ORDERNET; Kleinschmidt; Western Union; GEIS; CNCP; CompuServe; Control Data; TranSettlements; RAILINC; Ford; AT&T; Telecom Canada; IBM

Vendor Experience

Year Company Founded: 1983

Date Package First Available: 1984

EDI Professional Staff Resources

Technical Staff: 5

Hot Line: 4

Total: 17

Miscellaneous Information: Software assumes that only one communications network will be connected to the computer. If multiple network connections are desired, additional directories must be created on the system as a "workaround."

ANSI experience is primarily in the purchasing functions.

Programming Language Used by Package: APL

Baggerly & Associates

Address: 1420 N. Claremont Boulevard, Suite 209C
Claremont, CA 91711

Contact: Elizabeth Nash

Phone: (714) 625-7917

Product: *EDI*FOCUS*

Hardware/Operating System Environment: IBM compatible XT, AT, PS/2 with 20MB hard disk, 640K RAM, MS-DOS 3.0

EDI Standards/Transaction Sets Supported: X12, TDCC, VICS, WINS, UCS

Pricing:

Basic Package Cost:

\$945 — Translator and data input screens only; applications system interface and communications software are not included.

\$1,500 — Interface to applications system (flat file) and host interface (permits computer to operate as a front-end computer).

Additional Charge Per EDI Standard: None

Additional Charge Per Transaction Set: None

Annual Maintenance Fee: \$150 for *EDI*FOCUS*; \$300 for interface module

Maintenance Fee Includes: Standards updates, software enhancements, telephone support for software problem resolution

Training Fee: Varies depending on the extent of training required.

Additional Fees: Telephone support consultation; call for hourly rate.

Networks Directly Accessed: Western Union; GEIS; IBM; BT Tymnet

Vendor Experience

Year Company Founded: 1983

Date Package First Available: 1988

EDI Professional Staff Resources

Technical Staff: 8

Hot Line: 3

Total: 14

Miscellaneous Information: Vendor can also provide custom application development and implementation support.

Programming Language Used by Package: C

Bell Atlantic Network Services, Inc.

Address: 1310 N. Courthouse Road, 7th Floor
Arlington, VA 22201

Contact: Marjorie MacArthur

Phone: (703) 974-3919

Product: IntelliTrade
IntelliTrade Plus

Hardware/Operating System Environment: IBM compatible AT or PS/2 with MS-DOS 2.0 or higher

EDI Standards/Transaction Sets Supported: X12

Pricing:

Basic Package Cost:

\$799 if purchased at trading partner seminar; otherwise \$999

Additional Charge Per EDI Standard: Not available

Additional Charge Per Transaction Set: Not available

Annual Maintenance Fee: \$126

Maintenance Fee Includes: Software enhancements, standards updates

Training Fee: None

Additional Fees: None

Networks Directly Accessed: Bell Atlantic (IntelliTrade EDI); hot line is included as part of the network mailbox fee.

Vendor Experience

Year Company Founded: 1984

Date Package First Available: 4th quarter 1990

EDI Professional Staff Resources

Technical Staff: 1

Hot Line: 4

Total: 5

Miscellaneous Information: Bell Atlantic has an agreement with Harbinger*EDI Services to use Harbinger's InTouch*EDI products as the basis for the IntelliTrade products. Bell Atlantic has modified Harbinger's products to access the IntelliTrade EDI network.

Programming Language Used by Package: C

Birmingham Computer Group, Inc.

Address: 30850 Telegraph Road, Suite 250
Birmingham, MI 48010

Contact: Chuck Townsend

Phone: (313) 540-0640

Product: DTS: communications and translation software module with data mapping

Hardware/Operating System Environment: HP3000 (MPE); DEC VAX (VMS); IBM compatible XT, AT, PS/2, with MS-DOS 2.1 or higher, 10MB hard disk, 512K RAM (also operates with Novell Network and other LANs)

EDI Standards/Transaction Sets Supported: X12, TDCC, EDIFACT, Kmart

Pricing:

Basic Package Cost:

Microcomputer: \$1,500 – \$8,200, includes one trading partner and DTS; \$400 for each additional trading partner

HP3000 and VAX: \$11,000 – \$35,000, includes one trading partner and DTS; \$1,500 for each additional trading partner

Additional Charge Per EDI Standard: Microcomputer: \$1,900; HP3000, VAX: \$4,500

Additional Charge Per Transaction Set: None

Annual Maintenance Fee: 12 percent of purchase price

Maintenance Fee Includes: Standards updates, hot-line support, new software releases

Training Fee: \$60 per hour at vendor location; on site, travel and living expenses are extra.

Additional Fees: Source code available for \$15,000

Networks Directly Accessed: IBM; GEIS; Control Data; BT Tymnet

Vendor Experience

Year Company Founded: 1984

Date Package First Available: 1985

EDI Professional Staff Resources

Technical Staff: 6

Hot Line: 3

Total: 14

Miscellaneous Information: Other services available include manufacturing materials requirement planning software systems, bar coding systems, and consulting.

Programming Language Used by Package: Mostly COBOL

Lloyd Bush, Inc.

Address: 156 William Street
New York, NY 10038

Contact: Marcy McKinley

Phone: (212) 962-4004

Product: X-Change

Hardware/Operating System Environment: IBM compatible XT, AT, PS/2 with MS-DOS 3.0, 10MB hard disk, 640K RAM

EDI Standards/Transaction Sets Supported: X12, TDCC, AIAG, TCIF, VICS

Pricing:

Basic Package Cost: \$895 (\$495 if 25 packages or more are purchased)

Additional Charge Per EDI Standard: None

Additional Charge Per Transaction Set: None

Annual Maintenance Fee: None

Maintenance Fee Includes: Software support

Training Fee: No training required

Additional Fees: Optional software upgrades available for \$75-\$100 (standards updates are included)

Networks Directly Accessed: BT Tymnet; Western Union; GEIS; Control Data; RAILINC; ORDERNET

Vendor Experience

Year Company Founded: 1971

Date Package First Available: 1985

EDI Professional Staff Resources

Technical Staff: 3 (1 is also in technical support)

Hot Line: 4

Total: 6

Miscellaneous Information: Vendor also provides financial consulting for municipal bonds, timesharing, and other products.

Programming Language Used by Package: C

CAN/AM Tech Inc.

Address: 205 South Main Street
Slippery Rock, PA 16057

Contact: Norm Morrison
Dave Scheele

Phone: (412) 794-5884

Product: E-Z Order

Hardware/Operating System Environment: IBM compatible XT, AT, PS/2 with
MS-DOS 3.0, 20MB hard disk, 512K RAM

EDI Standards/Transaction Sets Supported: X12, TDCC, EDIFACT

Pricing:

Basic Package Cost: \$1,495 (includes communications)

Additional Charge Per EDI Standard: None

Additional Charge Per Transaction Set: None

Annual Maintenance Fee: \$495

Maintenance Fee Includes: Upgrades to standards, software enhancements, hot
line, reduced rate on any additional transaction sets required in the future

Training Fee: None

Additional Fees: \$500 per day for customized data entry screens, reports, and
flat file interfaces

Networks Directly Accessed: GEIS, Infonet (Additional networks can be accessed
upon request.)

Vendor Experience

Year Company Founded: 1985

Date Package First Available: 1987

EDI Professional Staff Resources

Technical Staff: 2 plus contract programmers

Hot Line: Staffed by Epson Canada

Total: 4

Miscellaneous Information: Vendor has entered into a distribution and joint support agreement with Epson Canada, MetCan, and Emerging Technologies USA. Hot line support is accessed via Epson's 800 number support network.

Programming Language Used by Package: Turbo Pascal, C

Control Data Corporation

Address: 14725 Detroit Avenue
Lakewood, OH 44107

Contact: Phil Kimble
Jim Townes

Phone: (919) 854-4563
(703) 998-1870

Product: REDI-MICRO – microcomputers
REDI-EXCHANGE – mainframe MVS operating system; supports only X12 standards
REDI-TRANSLATOR – all mainframe platforms including MVS

Hardware/Operating System Environment: IBM mainframe (MVS, DOS, DOS/VSE); DEC (Microvax, 6XXX, 8XXX, VMS); IBM compatible PC, XT, AT, 386 with hard disk, 512K RAM, MS-DOS 2.11 or higher; HP (Micro, 3000, Series I-II, 3X-7X, 9XX)

EDI Standards/Transaction Sets Supported: AIAG, X12, WINS, UCS, TDCC, VICS, EDIFACT

Pricing:

Basic Package Cost:

REDI-MICRO: \$700 includes communications software

REDI-EXCHANGE: \$7,500

REDI-TRANSLATOR: DEC: \$12,000 – \$22,500; HP: \$12,000 – \$22,500;

IBM MVS: \$22,500 – \$27,500

(Vendor offers volume discounts.)

Additional Charge Per EDI Standard: None

Additional Charge Per Transaction Set: REDI-MICRO – transaction sets are sold as a “family”; each family is \$250 at order time, and \$500 thereafter. REDI-EXCHANGE and REDI-TRANSLATOR – all transaction sets are included.

Annual Maintenance Fee: First 12 months are free for all products.

REDI-MICRO: currently free; a fee may be charged beginning the fourth quarter of 1990.

REDI-EXCHANGE: 15 percent

REDI-TRANSLATOR: DEC and HP: \$1,600 – \$3,200

REDI-TRANSLATOR: IBM: \$3,200 – \$3,700

Maintenance Fee Includes: Standards updates, software enhancements, hot line, 2 days of installation support for REDI-TRANSLATOR

Training Fee: \$300 per person at a selected site; if on a consulting basis, \$1,200 per day with travel and living expenses additional

Additional Fees: Not available

Networks Directly Accessed: GEIS; Kleinschmidt; ORDERNET; Harbinger; Control Data; Martin Marietta; TranSettlements; IBM; BT Tymnet; Western Union

Vendor Experience

Year Company Founded: 1957

Date Package First Available: 1985

EDI Professional Staff Resources

Technical Staff: Not provided

Hot Line: 20

Total: Not provided

Miscellaneous Information:

- Toll-free telephone support.
- Only the X12 standard is distributed with REDI-MICRO and REDI-EXCHANGE; other standards are not available. If TDCC transactions are required by a trading partner, the VAN must convert the transaction set from X12 to the appropriate TDCC-formatted transaction set.
- REDI-TRANSLATOR sold with all supported EDI standards.
- REDI-LINK communications software may be purchased for \$10,000. It is network independent and allows a mainframe to connect to any other VAN. (User can also write software or purchase communications software from another vendor.)
- Vendor has several other software modules available that can be used to print EDI documents or to communicate with a network. Vendor can provide details and prices.

Programming Language Used by Package:

REDI-EXCHANGE and REDI-MICRO: C

REDI-TRANSLATOR: COBOL 74

Data Dispatch Corporation

Address: 2000 Corporate Ridge, Suite 910
McLean, VA 22102

Contact: Fred Cuthbertson

Phone: (703) 749-3636

Product: EDI/SYNAPSE

Hardware/Operating System Environment: IBM compatible XT, AT, PS/2 with MS-DOS 3.0, 10MB hard disk, 640K RAM

EDI Standards/Transaction Sets Supported: X12, TDCC, EDIFACT

Pricing:

Basic Package Cost: Determined by distributor

Additional Charge Per EDI Standard: None

Additional Charge Per Transaction Set: None

Annual Maintenance Fee: Determined by distributor

Maintenance Fee Includes: Updates to standards, software enhancements, telephone support

Training Fee: Determined by distributor

Additional Fees: None

Networks Directly Accessed: RAILINC (uses a proprietary interchange envelope header); GEIS; IBM; ORDERNET

Vendor Experience

Year Company Founded: 1983

Date Package First Available: 1986

EDI Professional Staff Resources

Technical Staff: 10

Hot Line: 2

Total: 20

Miscellaneous Information: Sold exclusively through distributors, including RAILINC Corporation.

Programming Language Used by Package: C

Digital Equipment Corporation

Address: 146 Main Street
Maynard, MA 01754

Contact: Craig Mitchell

Phone: (603) 884-0753

Product: DEC/EDI

Hardware/Operating System Environment: DEC VAX (VMS)

EDI Standards/Transaction Sets Supported: X12, TDCC, EDIFACT, VICS, WINS

Pricing:

Basic Package Cost: \$11,356 – \$41,642, depending on processor size

Additional Charge Per EDI Standard: None

Additional Charge Per Transaction Set: None

Annual Maintenance Fee: Fee varies based on service and warranty contract; average is 15 percent of software purchase price.

Maintenance Fee Includes: Depends on service and warranty contract purchased.

Training Fee: Varies

Additional Fees: None

Basic Package Cost:

GENTRAN: IBM MVS \$36,850; VSE \$33,500; DEC VAX \$20,100

GENTRAN Plus: DOS Bi-Sync \$69,500; DOS SNA \$75,000; DOS Combo \$85,000; OS Bi-Sync \$81,500; OS SNA Peer-to-Peer \$109,500; OS Combo Peer-to-Peer \$122,500

GENTRAN/400: Models B10, B20, B30, B35 \$9,800; B40, B45, B50 \$13,600; B60, B70, B80 \$18,200

TRANSLATOR*MVS: \$36,850

TRANSLATOR*VSE: \$33,500

TRANSLATOR*36: \$6,000

TRANSLATOR*38: \$13,000

TRANSLATOR*400: models B10, B20, B30, B35 \$9,800; B40, B45, B50 \$13,600; B60, B70, B80 \$18,200

MICRO*TRAN: \$1,995

QUICK*TRAN: \$2,750

PRO*TRAN: \$4,250

(All basic packages include source code.)

Additional Charge Per EDI Standard: None

Additional Charge Per Transaction Set: None

Annual Maintenance Fee: First year free, then 15 percent of current price

Maintenance Fee Includes: Standards updates, hot line, software enhancements

Training Fee: Two days of installation and training at user site are included in mainframe products.

Additional Fees: Not available

Networks Directly Accessed: ORDERNET; GEIS; BT Tymnet; IBM; Control Data; TranSettlements; Kleinschmidt; RAILINC

Vendor Experience

Year Company Founded: 1978

Date Package First Available: 1987

EDI Professional Staff Resources

Technical Staff: 35

Hot Line: 10

Total: 300

Miscellaneous Information: Vendor recently purchased Metro-Mark Integrated Systems, Inc., and their line of EDI software products. Vendor also offers EDI implementation programs, database services, communications software, consulting, and EDI education.

Programming Language Used by Package:

MICRO*TRAN – 74 COBOL

TRANSLATOR*36, *38, *4XX – RPG

TRANSLATOR*VSE, TRANSLATOR*MVS – ANSI 74 COBOL

GENTRAN Products – ANSI COBOL, RPG

Supply Tech, Inc.

Address: 27784 Franklin Road
Southfield, MI 48034

Contact: Wendell Holladay

Phone: (313) 357-3430

Product: STX12

Hardware/Operating System Environment: IBM compatible XT, AT, PS/2, 386 with 640K RAM, 10MB hard disk (recommends 20MB), MS-DOS 3.0 or higher; IBM compatible mainframe (MVS and DOS/VSE)

EDI Standards/Transaction Sets Supported: X12, TDCC, UCS, EDIFACT

Pricing:

Basic Package Cost:

Microcomputer: \$2,295 – \$3,990 (includes two custom transaction formats, 997 transaction set, and one communications module for one network)

Mainframe: \$9,500 – \$35,000

Additional Charge Per EDI Standard: None

Additional Charge Per Transaction Set: None

Annual Maintenance Fee: Microcomputer: \$600 – \$780; Mainframe: 15 percent of list price

Maintenance Fee Includes: Hot line, software enhancements

Training Fee: \$500 per person per day

Additional Fees: Call vendor.

Networks Directly Accessed: GEIS; ORDERNET; Kleinschmidt; RAILINC; TranSettlements; Western Union; Sears; Control Data; Dialcom; IBM; Telecom Canada; DATA PAC; CompuServe; AT&T; BT Tymnet

Vendor Experience

Year Company Founded: 1984

Date Package First Available: 1987

EDI Professional Staff Resources

Technical Staff: Not available

Hot Line: Varies

Total: 85

Miscellaneous Information: Vendor's EDI products are available to DoD activities through General Services Administration Contract #GS00KAGS5192.

Programming Language Used by Package: MicroFocus COBOL

Synergistic Systems, Inc.

Address: 442 North 3rd Street
Neptune Beach, FL 32233

Contact: Ron Meison

Phone: (904) 249-0201

Product: BIZIBOX

Hardware/Operating System Environment: IBM compatible PC, AT, 386, PS/2 with MS-DOS 3.3, 20MB hard disk, 1MB RAM

EDI Standards/Transaction Sets Supported: X12, TDCC (All transaction sets supported are "developed" on a customer request basis.)

Pricing:

Basic Package Cost:

\$1,895: Standalone system for PC or AT with one transaction set

\$8,495: Flat file system for AT or 386, with six transaction sets

\$14,495: For 386 only, direct mapping from application data to standards, includes all transaction sets

Additional Charge Per EDI Standard: None

Additional Charge Per Transaction Set: None

Annual Maintenance Fee: First 90 days are free, then 15 percent of purchase cost

Maintenance Fee Includes: Standards updates, software enhancements, customer support

Training Fee: Included in purchase price

Additional Fees: Not available

Networks Directly Accessed: IBM; Control Data; TranSettlements; GEIS; BT Tymnet

Vendor Experience

Year Company Founded: 1986

Date Package First Available: 1988

EDI Professional Staff Resources

Technical Staff: 6 (maintenance only)

Hot Line: 2

Total: 7

Miscellaneous Information: Vendor specializes in distributed processing for mid- to large-size computer systems.

Programming Language Used by Package: C

TSI International

Address: 45 Danbury Road
P. O. Box 840
Wilton, CT 06897-0840

Contact: Meg Murdock

Phone: (203) 761-8600

Product: TranSlate

Hardware/Operating System Environment: IBM compatible mainframes (DOS/VSE or MVS); HP; DEC VAX; Unisys

EDI Standards/Transaction Sets Supported: X12, TDCC, VICS, WINS

Pricing:

Basic Package Cost:

DOS/VSE: \$30,000

MVS: \$35,000

Non-IBM: \$25,000

Additional Charge Per EDI Standard: None

Additional Charge Per Transaction Set: None

Annual Maintenance Fee: First year included in purchase price, then 15 percent of current list price

Maintenance Fee Includes: Hot line, software enhancements, standards updates

Training Fee: \$300 per day per person at vendor site; \$1,000 per day plus expenses at client site

Additional Fees: Not available

Networks Directly Accessed: GEIS; IBM; ORDERNET; BT Tymnet; Kleinschmidt; RAILINC; TranSettlements; Western Union

Vendor Experience

Year Company Founded: 1967

Date Package First Available: 1982

EDI Professional Staff Resources

Technical Staff: 5

Hot Line: 4

Total: 8

Miscellaneous Information: Vendor acquired TranSettlements, Inc.'s, TranSlate EDI product in March 1990; it is currently developing a data mapping utility (Trading Partner) that requires no programming by the purchaser.

Programming Language Used by Package: ANSI 74 COBOL

Wright Systems, Inc.

Address: 14492 Sheldon Road, Suite 300
Plymouth, MI 48170

Contact: Dick Dressell

Phone: (800) 234-7253
(313) 459-7760

Product: Wright EDI

Hardware/Operating System Environment: IBM System 36, System 38, AS400

EDI Standards/Transaction Sets Supported: X12, WINS, VICS, TDCC, AIAG

Pricing:

Basic Package Cost:

System 36: \$4,000

System 38: \$7,000

AS400: \$6,000 – \$18,000

(Basic package includes translator, communications software, RJE communications, 997 transaction set, and two additional transaction sets.)

Additional Charge Per EDI Standard: None

Additional Charge Per Transaction Set: \$500

Annual Maintenance Fee: 18 percent of total current value of package; first 90 days are free.

Maintenance Fee Includes: Standards upgrades, software enhancements, hot-line support

Training Fee: \$600 per day

Additional Fees: Vendor will program custom interfaces for \$75 per hour.

Networks Directly Accessed: IBM; GEIS; Control Data; Kleinschmidt; ORDERNET; BT Tymnet (Vendor will access additional networks as requested by a user; the cost will depend upon the user's requirements.)

Vendor Experience

Year Company Founded: 1977

Date Package First Available: 1987

EDI Professional Staff Resources

Technical Staff: 10

Hot Line: 4

Total: 18

Miscellaneous Information: Vendor's X12 experience is primarily in the automotive industry; vendor provides some consulting services.

Programming Language Used by Package: RPG

APPENDIX C

EDI TRANSLATION SOFTWARE FUNCTIONS AND FEATURES

Table C-1 identifies 48 functions and features that could be included in an EDI translation software package for three different operating environments: stand-alone microcomputer, front-end microcomputer, minicomputer, or mainframe. Those operating environments stem from an analysis of DoD's 152 largest CONUS shipping activities that generate Government bills of lading.

TABLE C-1

EDI TRANSLATION SOFTWARE REQUIREMENTS

Function/feature	Operating environment		
	Stand-alone	Front-end	Minicomputer/ mainframe
Communications Features			
Communications Software	M	M	M
Transaction Set Consolidation Routines	M	M	M
Multiple Communications Interface	O	O	O
Network Identification Table	M	M	M
Unattended Operations Capability	M	M	M
Systems Utilities			
Automatic Recovery/Restart Capability	M	M	M
Installation Routines	M	M	O
System Interface Routines			
Application System Interface	M	M	M
Data Input Screens	M	O	O
Input Editing	M	O	O
User-Defined Print Output	M	O	O
User-Definable System Interface	O	O	O
User-Defined Data Input Screens	O	O	O
Customized Operations Routines			
Code Conversion Capability	O	O	O
Data Element Delimiter Table	M	M	M
Functional Acknowledgment Capability	M	M	M
Multiple Header Support	M	M	M
Segment Terminator Table	M	M	M
Trading Partner Profile	O	M	M
Transaction Set Sequential Numbering	M	M	M
Version Support Table	M	M	M
Editing Features			
Character Conversion Capability ^a	O	O	O
Inbound Standards Compliance Editing	M	M	M
Internal Codes Duplication Routine	M	O	O
Outbound Standards Compliance Editing	M	M	M
Transaction Set Correction Capability	M	O	O

Note: M = mandatory; O = optional.

^a Pertinent to only those sites that will use point-to-point communications with one or more trading partners.

TABLE C-1

EDI TRANSLATION SOFTWARE REQUIREMENTS (Continued)

Function/feature	Operating environment		
	Stand-alone	Front-end	Minicomputer/ mainframe
System Maintenance Routines			
Automated Purging	M	M	M ^b
Expandability	M	M	M
Maintenance Support	M	M	M
Table-Driven Software Structure	M	M	M
Transaction Set Archiving	M	M	M
Version Support	M	M	M
Report Functions			
Error Reports	M	M	M
Functional Acknowledgment Reconciliation	M	M	M
Inbound Transaction Set Reporting	M	M	M
Outbound Transaction Set Reporting	M	M	M
Transmitted Characters	O	O	O
User-Defined Management Reports	O	O	O
Support Features			
Help Screens ^c	O	O	O
Technical Documentation	M	M	M
Trainings ^c	M	M	M
Tutorial Packages ^c	O	O	O
User Documentation	M	M	M
User Support (Hot Lines)	M	M	M
Miscellaneous Features			
Compatibility with Encryption and Authentication Packages ^d	O	O	O
Multiple Users	O	O	O
Selective Accessibility	M	M	O
System Entry Security	M	M	O

Note: M = mandatory; O = optional.

^b Operating system utilities separate from the translation software package may fulfill this requirement.

^c Either training or the help screens and tutorial package is mandatory.

^d When the requirements for such a feature have been fully defined, we expect this feature will be mandatory for all operating environments.

APPENDIX D

SOFTWARE PRODUCT SURVEY RESULTS

This appendix presents the results of a telephone survey of EDI translation software vendors. The information obtained in that survey is categorized by the type of computer hardware required by the software package: microcomputer (Table D-1), minicomputer (Table D-2), or mainframe (Table D-3). We did not request detailed information for those features that all vendors typically claim are included in their software. For example, virtually all vendors claim their software is "table-driven" and includes "transaction set archiving." Instead, we focused on those features that we believe help to differentiate the various product offerings. To illustrate: although user-defined management reports are not required by any of the operating environments, we believe that feature is very useful and not offered by all vendors.

- 1 Trading partners must be set up by vendor.
 - 2 May be specified for each transaction set used by a trading partner.
 - 3 Nonautomated; available via menu selection or "pull-up window."
 - 4 Supports the EDIFACT header UNA/UNB.
 - 5 Data element codes are also validated.
 - 6 Will sell a turnkey Informix solution (SQL or report writer) or provide interface to another system.
 - 7 Parameter driven; optional.
 - 8 Can be defined by the user.
 - 9 Must be set up every day.
 - 10 Cannot be specified for each trading partner.
 - 11 Help messages can be defined by the user for each data element in each transaction set used by a particular trading partner.
 - 12 Requires vendor assistance.
 - 13 Toll-free 800 number.
 - 14 BG header is not supported; TDCC is not supported.
 - 15 Each transaction set type is not individually numbered.
 - 16 Reports the number of blocks transmitted by the modem.
 - 17 Performed by vendor.
 - 18 Erroneous transactions are received and flagged in a report.
 - 19 Available for an additional fee.
 - 20 Compliance editing occurs after input screen has been completed.
 - 21 Limited field-by-field editing; user can also override the standards on a field basis.
 - 22 Accepts erroneous transactions. User manually determines if transaction is acceptable.
-
- 23 In development.
 - 24 Requires a different map for each affected trading partner's transaction set.
 - 25 Specific data element editing requirements can be specified for each trading partner.
 - 26 Only checks header controls on inbound transactions.
 - 27 Checks only the interchange envelope and functional group headers; permits nonstandard transactions to be sent and received.
 - 28 Reports the number of transaction sets sent by each trading partner.
 - 29 User-specified dates may be overridden.
 - 30 Nonautomated; requires use of system editor.
 - 31 Reports the number of bytes sent for each transaction set; the number of bytes per network is not reported.
 - 32 In Beta Test mode.
 - 33 Interchange control checking only.
 - 34 Only once per day.
 - 35 Records are purged during the archiving process.
 - 36 Supported by Harbinger's network.
 - 37 Transaction sets are numbered only by functional group or by network.
 - 38 Data bases are automatically encrypted.
 - 39 Depends upon the transaction sets in use by the trading partner.
 - 40 Requires knowledge of EDI standards.
 - 41 Loops within transaction sets are not validated for compliance with the standards.

- 1 Also indicates the number of segments transmitted; Ordernet's network bills by the number of segments sent.
 - 2 May be specified for each transaction set used by a trading partner.
 - 3 Data element codes are also validated.
 - 4 Reports the number of transaction sets sent by each trading partner.
 - 5 Supports the EDIFACT header UNA/UNB.
 - 6 Requires vendor assistance.
 - 7 Will provide interface to another data base or sell user a turnkey Informix solution (SQL or report writer).
 - 8 Compliance editing occurs after input screen has been completed.
 - 9 BG header is not supported; TDCC is not supported.
 - 10 Only available on the HP3000.
 - 11 Available for an additional fee.
 - 12 User may add or delete codes for each trading partner.
 - 13 User-specified dates may be overridden.
 - 14 Nonautomated; requires use of system editor.
 - 15 Nonautomated; available via menu selection or "pull-up window."
 - 16 Reports the number of bytes sent for each transaction set; the number of bytes per network is not reported.
-
- 17 "Batch" mode only.
 - 18 Requires purchase of data mapping product (EDImap).
 - 19 Source code for menus and reports is provided.
 - 20 Compliance editing occurs after input screen has been completed.
 - 21 Limited editing.
 - 22 Records are purged during archiving process.
 - 23 Toll-free 800 telephone number.
 - 24 Requires a different map for each affected trading partner's transaction set.
 - 25 Only outbound transmissions are numbered.
 - 26 User can control the level of checking for each trading partner.
 - 27 Can be customized by user.
 - 28 Specific data element editing requirements can be specified for each trading partner.
 - 29 "Rejected" transaction sets can be optionally accepted.
 - 30 Only once per day.
 - 31 Available upon user request. Limited screens are available.
 - 32 Data dictionary is supplied for use with a report generator; suggest purchasing IBM's "Query" product.

1 Available for an additional fee

¹ Available for an additional fee.

² Supports the EDIFACT header UNB/UNH.

³ May be specified for each transaction set used by a trading partner.

⁴ User may add or delete codes for each trading partner.

⁵ "Batch" mode only.

⁶ Requires purchase of data mapping product (EDMap).

⁷ Data element codes are also validated.

⁸ Reports the number of transaction sets sent by each trading partner.

⁹ Source code for menus and reports is provided.

¹⁰ A shell written in COBOL is provided; programmer must complete the PROCEDURE division.

¹¹ Requires a report writer.

¹² Toll-free 800 telephone number.

¹³ For CICS portion only.

¹⁴ Requires the use of operating system utilities.

¹⁵ Specific data element editing requirements can be specified for each trading partner.

¹⁶ Only in GENTRAN Plus; may be set up by transaction set, trading partner, or network.

¹⁷ Also indicates number of segments transmitted; OrderNet's network bills by the number of segments sent.

¹⁸ Nonautomated; requires use of system editor.

¹⁹ "Rejected" transaction sets can be optionally accepted

APPENDIX E

SELECTING EDI TRANSLATION SOFTWARE

This appendix discusses how this guide can be used to aid in the selection of EDI translation software for Military Department or Defense agency activities. A step-by-step procedure for selecting EDI translation software for a particular activity follows:

- Identify the activity's EDI data processing requirements, including the application system that will be integrated with the EDI translation software.
- Identify the hardware and corresponding operating system upon which the EDI software will reside. Categorize the hardware as microcomputer, minicomputer, or mainframe and determine the EDI translation software requirements for a specific activity. Use Appendix C to identify the functions and features required by the EDI translation software package for the specific operating environment.
- Use Appendix A to identify those vendors that sell software for the desired hardware environment (microcomputer, minicomputer, or mainframe).
- Use Appendix B to look up the detailed software product offerings and descriptions for those vendors identified in the previous step. Identify those vendor products that offer EDI translation software for the required hardware and operating system.
- Determine if the products identified in the previous step satisfy the activity's major EDI translation software requirements by using Appendix D, Software Product Survey Results.

In most cases, more than one product will meet an activity's requirements. We then suggest that product literature be requested from those vendors and, procurement rules permitting, we also advise a product demonstration. If only one product meets an activity's requirements, we recommend that a test copy be obtained and tested on the system that is to become EDI capable.
